

Why hosted?

Experience peace of mind with greater security, ease of use, and cost savings.

Investing in your future ...

When you transition to hosted, we take over daily security and service responsibilities. Hosted solutions provide predictability and eliminate surprises associated with on-premise hardware and software.

Disaster recovery

Intergy Hosted provides full fault tolerance, enabling nearly 100% availability.

Cyber Liability Insurance

This covers any costs associated with the liability of a claim or suit related to a data breach.

Version upgrades

No longer worry about version issues or vulnerabilities associated with them. Stay current on releases of both software and operating systems without worry.

Secure servers

Our SAS70 Level II-audited systems protect you from hackers, spam, and other malware and threats. Our systems are housed in a guarded Tier IV facility, with N+2 power and cooling infrastructure.

24/7 monitoring

Real-time monitoring that includes operational and application performance, anytime, anywhere when you are connected to high-speed internet.

Next-generation anti-virus

We research and install quality anti-virus software, and we respond to and neutralize all threats.

System patching

We perform application and service pack updates without interrupting your practice. We reduce tasks and costs that on-premise practices would be responsible for.

Endpoint detection and response

We supply threat protection and isolation that provides continuous monitoring and response to advanced threats and security issues.

Common questions

Q: Who will own my data if we move to hosted?

A: You retain rights and ownership, and we host your application and data.

Q: What if we have interfaces to other vendors in our current environment?

A: We can re-establish most interfaces to our hosted servers. As part of our discovery process, we will work with you to conduct a review of your interfaces.

Q: How does the ROI of hosted compare to on-premise?

A: Hosted applications generally deliver a better return on investment. Factors include:

- Low start-up costs
- Low cost of ownership
- Scalable pricing
- Security

\$408

The average cost of a lost or stolen medical record for healthcare practices in 2018.*

201

The average number of days to identify a data breach in the United States.*
