

THE TIME FOR REMOTE MONITORING IS NOW

Covid-19 has brought the need to modify how healthcare professionals interact with patients. Keep your patients home, safe, and well cared for with telehealth and messaging.

Use our straightforward onboarding process to get up and running in 24 hours. This enables you to remotely:

have a fully reimbursed telehealth visit with your patients

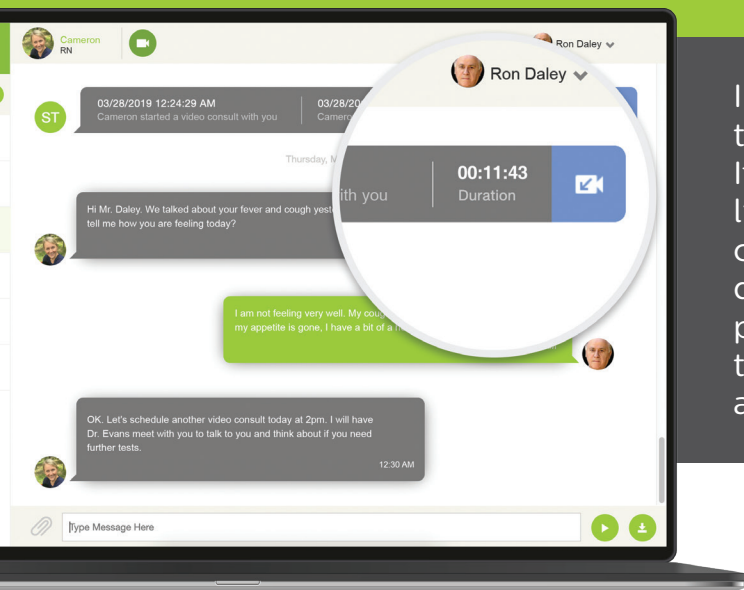

communicate with your staff in real-time

streamline communication for best care outcomes

receive images and health updates from your patients, remotely

IM Your Doc is an easy to use, easy to deploy telehealth and messaging HIPAA compliant platform. It is just what you and your patients need in a time like this to keep patients at home while still being cared for, their questions answered and providing a quick way for your practice to get information to your patients. And the best news? You can now bill your telehealth visit as a standard office visit with almost all other billing restrictions removed.
