

PARTNER WITH GREENWAY HEALTH FOR EXPERT GUIDANCE:

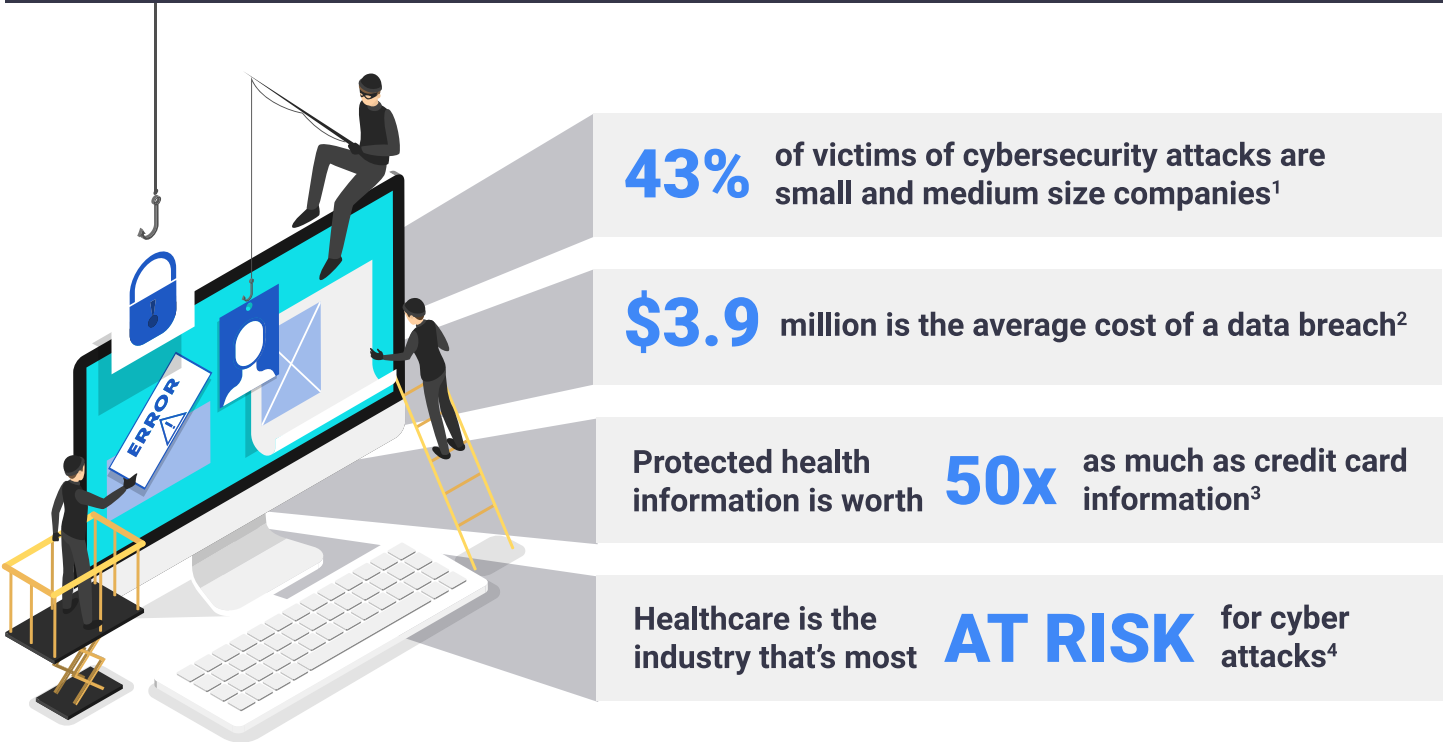

Windows 2012 End of Support

At Greenway Health, our priority is to help you host your data on the most secure, up-to-date technology to optimize your experience. Microsoft's ending support for Windows 2012 on **October 10th, 2023**, means no more security or other updates, putting *your business and HIPAA compliance at risk*.

From Greenway's perspective, future upgrades to your EHR software won't work with Windows 2012.

Now is the time to decide! Move onto our Greenway Secure Cloud or upgrade your system to the most recent Windows Operating System compliant version.

Did you know?

Let's compare the options available to your practice:

NOT UPGRADING	UPGRADING TO THE CLOUD	UPGRADING TO STAY ON PREM
SECURITY AND COMPLIANCE		
<ul style="list-style-type: none"> ✗ Undermines the ability to receive cybersecurity insurance, potentially increasing premiums ✗ Undermines the ability to receive security certifications (i.e., HITRUST) ✗ Increases risk for HIPAA security incidents 	<ul style="list-style-type: none"> ✓ Keeps your data safe in a secure center, offering data uptime of 99% per year ✓ Helps you use fewer resources on IT and spend more time on patient care ✓ Keeps the software up-to-date automatically, ensuring compliance in the constantly evolving regulatory environment 	<ul style="list-style-type: none"> ✓ Keeps your data safe with upgraded Windows operating system ✗ Leaves you more vulnerable to on-premise physical security issues such as natural disasters, cyber-attacks, and human errors
COST		
<ul style="list-style-type: none"> ✗ Risk for potential fines due to staying on an unsupported Windows operating system ✗ Increased risk for costly ransomware attacks due to potential vulnerabilities related to a non-supported server 	<ul style="list-style-type: none"> ✓ All-inclusive pricing through offering a full suite of Greenway products in one bundle, which simplifies invoices, saves billing staff time, and eliminates the "nickel-and-diming" 	<ul style="list-style-type: none"> ✗ Larger upfront hardware and installation costs ✗ Recurring hardware replacement costs every 3-5 years ✗ Additional costs to run and maintain your IT infrastructure, related to staffing and support
UPGRADES		
<ul style="list-style-type: none"> ✗ Will not receive any security or other updates after 10/10/2023 through Microsoft ✗ Future versions of your EHR will drop support for Windows 2012 	<ul style="list-style-type: none"> ✓ With the support of Greenway Secure Cloud resources, you will receive automatic software upgrades, which may eliminate the need for additional IT resources 	<ul style="list-style-type: none"> ✓ Will receive respective Windows updates ✗ On-premise upgrades take 8-10 hours and demand long work hours from practice professionals ✗ When capacity is reached, on-premise sites require additional hardware purchases and installations

Conclusion:

The **dynamic healthcare landscape** and regulations and complex healthcare IT systems require flexible and scalable solutions, rendering on-premise options inadequate.

It is **more critical than ever** healthcare practices identify ways to reduce costs, improve staff efficiency, and ensure health data is secure while also providing exceptional care.

Let's partner and help you make the best decision for your practice.
