

▶ Unleashing Tomorrow's Healthcare Today

Revolutionize Your Healthcare Journey

In today's healthcare environment, the Resource and Patient Management System (RPMS) presents many challenges for healthcare providers. The IHS IT modernization project, poised for a full replacement, is still awaiting momentum, leaving organizations grappling with the consequences of operating on a combination of disparate systems. The antiquated product interface, coupled with a lack of regular updates and support, further compounds the complexities faced by healthcare professionals. **The existing reporting limitations and the imperative need for clinical and financial optimization** highlight the pressing demand for **a transformative solution**.

THE FUTURE OF HEALTHCARE STARTS NOW

Seamlessly navigate disparate systems, optimize clinical and financial operations, and propel forward in the modern era of patient care.

Intergy® is poised to revolutionize healthcare management by addressing your challenges head-on, providing a seamless and efficient alternative to propel organizations into the modern era of healthcare delivery.

TRIBAL HEALTH SPECIFIC WORKFLOW BUILT INTO PM AND EHR

Intergy® offers a tailored solution for tribal health organizations. With a focus on meeting the unique needs of tribal health practices, Intergy integrates specialized workflows into Practice Management (PM) and Electronic Health Record (EHR) software. This comprehensive approach ensures that tribal health professionals can navigate their daily operations with efficiency and precision. From patient management to billing and reporting, Intergy is designed to empower tribal health providers, facilitating a streamlined and culturally sensitive healthcare experience for both providers and patients.

NATIONAL DATA WAREHOUSE REPORTING

With its National Data Warehouse reporting capabilities, Intergy sets a new standard in healthcare data management. This groundbreaking feature empowers healthcare providers by consolidating and analyzing comprehensive data on a national scale. Intergy's National Data Warehouse reporting not only enhances decision-making processes but also ensures compliance with evolving healthcare regulations. This strategic tool equips healthcare professionals with the insights needed to deliver optimized patient care, fostering a data-driven approach that promotes efficiency and quality across the entire spectrum of healthcare services.

GPRA/SDPI REPORTING

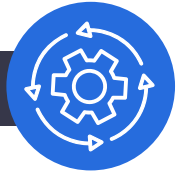

Greenway takes healthcare reporting to the next level, showcasing remarkable capabilities in addressing both GPRA (Government Performance and Results Act) and SDPI (Special Diabetes Program for Indians) requirements. With precision and efficiency, Intergy seamlessly generates reports that not only meet the stringent criteria of GPRA but also streamline the reporting process for SDPI initiatives. In addition to ensuring compliance, this integrated functionality empowers healthcare providers with actionable insights, fostering a proactive approach to managing and improving patient outcomes. Intergy stands as a reliable ally for healthcare organizations committed to delivering excellence in care while navigating the complexities of regulatory reporting.

PURCHASED REFERRED CARE TRACKING AND AUTHORIZATIONS

Intergy proves itself an indispensable asset for healthcare organizations with its advanced Purchased Referred Care (PRC) tracking and authorization capabilities. Intergy streamlines the complexities of PRC tracking, while enhancing the authorization workflow, ensuring a seamless and efficient experience for healthcare providers. The platform's robust features empower organizations to navigate the intricacies of PRC management with precision, reducing administrative burdens and optimizing resource allocation. With Intergy, healthcare professionals can confidently manage and authorize care referrals, fostering a more streamlined and patient-centric approach to Purchased Referred Care.

FULL DATA CONVERSION FROM RPMS

Greenway Health leads the way in healthcare technology, delivering unparalleled capabilities in data conversion from RPMS. Our robust systems seamlessly facilitate a comprehensive and accurate transfer of data from RPMS, ensuring a smooth transition for healthcare organizations. This advanced data conversion feature not only saves valuable time but also preserves the integrity of critical patient information. Greenway Health's commitment to delivering excellence in healthcare technology is evident in our ability to provide a seamless and efficient full data conversion from RPMS, empowering organizations to embrace innovation without compromising on data integrity.
