

# Your AI-driven Ambient Documentation Tool

Greenway Clinical Assist is a cutting-edge ambient AI technology that works with Intergy® and Prime Suite™, elevating the patient-provider experience with the transformative capabilities of ambient documentation. Engineered to streamline your documentation workflow, it effectively addresses burnout among providers by **reducing time spent on clinical notetaking**, allowing you to allocate **more time toward providing exceptional patient care**.

## THE BENEFITS OF GREENWAY CLINICAL ASSIST:

### Successful Providers and Empowered Patients:

Streamlined documentation processes support providers in delivering focused patient care.

### Efficient Clinical Documentation:

Seamless capture of verbal interactions, removing the need to manually input data, saving significant time and effort.

### Time Savings:

Reclaim up to 2 hours per day, per provider.

## OVERCOMING CHALLENGES WITH GREENWAY CLINICAL ASSIST:

- **Address Inefficient Documentation Methods:** With customizable features and integration into daily practice routines, Greenway Clinical Assist streamlines documentation by capturing verbal interactions, minimizing disruptions, and enhancing clinical interactions.
- **Reduce Physician Burnout:** Providers save valuable time, experience a reduction in administrative burden, and gain time to put their focus back on patient care.
- **Improve Patient Satisfaction:** Reduced paperwork burden allows providers to engage in more open and effective communication with patients, leading to better understanding and heightened trust.

## KEY FEATURES OF OUR AI AMBIENT DOCUMENTATION SOLUTION:

- ✓ **Effortless Note Generation and Access** – Using advanced AI technology to combine proprietary algorithms with industry-leading large language models, Greenway Clinical Assist transcribes encounter details with precision, giving providers access to comprehensive clinical notes instantly.
- ✓ **Tailored Workflows** – Personalized approach that supports customization of clinical note structure, narration style, and content order. Greenway Clinical Assist learns your preferences, streamlining your workflow and enhancing efficiency.
- ✓ **Flexible Functionality** – Caters to all healthcare environments—in-person, telehealth, inpatient, outpatient—and diverse language needs, offering consultations supporting encounters in English (US), English (UK), French, and Spanish (with the generated note in English).

*“ Before using this tool, I was juggling documentation, listening, and recalling patient details. Now, I’m more engaged and focused during appointments, as the tool handles documentation seamlessly. It’s freed me up to connect more meaningfully with my patients. ”*

– Dr. Michael Kozak, Assistant Chief Medical Officer, Healthline

*“ Utilizing GEN AI, Greenway Clinical Assist lets you concentrate on the patient interaction rather than documentation. The system auto-generates a comprehensive note for review from your conversation with the patient while filtering out topics unrelated to the medical issues. ”*

– Dr. Michael Blackman, Chief Medical Officer, Greenway Health
