

## Benefit Overview

### GREENWAY™ INSIGHTS

Greenway Insights is a powerful, cloud-based analytics tool used to enhance data-driven decision-making:

Keep compliant by providing necessary regulatory reporting

Improve the delivery and quality of healthcare

*To be able to attest for regulatory reporting, you must be using the minimum version required for Intergy® and Intergy Practice Analytics®.*

## Rely on a powerful analytics tool to ensure compliance with regulatory reporting requirements more efficiently.

Seamlessly integrated as a regulatory reporting engine for MIPS quality and Promoting Interoperability measures, and UDS reporting, Greenway Insights delivers on the need to support annual regulatory reporting, with greater ease and support from your Greenway Health partner.

### KEY FEATURES:

- Greenway Insights is the reporting solution for MIPS eQMs
- Greenway Insights provides MIPS Promoting Interoperability (PI) measures
- Intergy users can also report on Uniform Data Systems (UDS) measures
- Users can report on programs in two data modes – EHR and QRDA
- Utilize the Measure Scorecard to view Measure Performance details and patient tables
- Greenway Insights training is accessible via Beacon with MyGreenway
- The Regulatory Resource Hub in MyGreenway is available to help prepare you for 2024 regulatory reporting
