

Improving Patient Health OUTCOMES

Greenway's Intergy Electronic Health Record: A guiding principle in selecting the right Electronic Health Record (EHR) for your practice is that your clinicians can quickly learn and use the technology to enhance their clinical workflow. Intergy EHR is a **physician-focused, patient-centric solution** that allows you to access clinical information easily, is customizable based on your specialty, and adapts to existing workflows rather than forcing you to change how you work. Intergy EHR complements your clinical approach by **providing streamlined interactions** that facilitate your current practice workflow and include numerous robust features.

KEY BENEFITS:

- **Specialty-specific EHR** – Whether you practice primary care, pediatrics, OB-GYN, or another specialty, Intergy EHR has features tailored to your unique needs.
- **Simplified workflows** – Improve efficiency with easy-to-navigate documentation that does not slow you down and provides customized views for optimized provider workflows.
- **Revenue optimization** – Enhance coding accuracy within Intergy EHR and realize billing efficiencies with our integrated Practice Management solution, Intergy PM.

CHALLENGES WE ADDRESS:

Fragmented patient information

Intergy EHR integrates patient information from various sources into a single, unified electronic record. This consolidation of patient data helps eliminate fragmentation and enables healthcare providers to see a comprehensive view of the patient's health.

Data accessibility and security

Intergy EHR provides secure and authorized access to patient data, ensuring that patient information is readily available to authorized healthcare providers when needed while maintaining patient privacy and data security.

Compliance with regulations and standards

Intergy EHR is designed to comply with industry standards and regulations, including 21st Century Cures and MIPS (Merit-Based Incentive Payment System) requirements. By providing built-in compliance features and tools, Intergy EHR helps healthcare organizations meet regulatory requirements and improve patient outcomes.

Interoperability

Intergy EHR supports interoperability by facilitating the exchange of patient information between different healthcare systems and providers, enabling seamless sharing of data with external laboratories, pharmacies, and other healthcare organizations, promoting continuity of care.

OUR SOLUTION INCLUDES:

- Clinical documentation
- Electronic prescribing and ordering
- Health reminders
- Interoperability
- Reporting and analytics
- Mobile access

RESULTS YOU CAN EXPECT/OUTCOMES:

- ✓ **Enhanced patient care:** Intergy EHR offers healthcare providers easy access to complete and up-to-date patient information, including medical history, test results, allergies, and medications helping to improve clinical decision-making and promoting effective and personalized patient care.
- ✓ **Streamlined workflow:** The Intergy EHR system is designed to streamline clinical tasks and workflow processes within healthcare organizations. It provides tools for managing prescription requests, reviewing results, addressing patient secure messages, improving efficiency, and enhancing overall workflow.
- ✓ **Improved communication and collaboration:** Intergy EHR facilitates seamless communication and collaboration among healthcare providers and patients, allowing for secure messaging, sharing of patient information, and coordination of care across different healthcare settings thereby promoting care coordination and patient safety.
