

Coverage ID™

Fast, simple and accurate insurance coverage discovery results

Delayed reimbursement due to lack of coverage or errors is a pain point in many revenue cycles. Highly manual intervention and processes needed to manage insurance denials are aggravated by staffing demands and the high cost of postage for printed statements.

Let Coverage ID from RevSpring change all that!

Throughout the revenue cycle there are opportunities to **discover untapped revenue streams** with RevSpring Coverage ID. **Maximize claim reimbursements** by detecting unreported or hidden coverages for your patients.

Identify Active Coverage with Coverage ID

Save staff time and energy and increase revenue with coverage discovery empowered by RevSpring. Achieve a complete and thorough scan of possible patient insurance coverage using basic patient demographics. Coverage ID also uses skip tracing to search multiple databases and identify active coverages at local, state and national levels.

Other advantages: improved cost estimates, enhanced real-time eligibility results, increased pay rate, and the advancement of your revenue cycle goals. Transmit data automatically—either in batches or on-demand—to eliminate burdensome integrations with other vendors, while simplifying revenue cycle workflows.

Benefits

- **Boost** reimbursement and payment turnaround time
- **Decrease** claim denials
- **Save** staff time and energy
- **Reduce** manual processes
- **Reduce** patient statement and collection costs

Features

- **Proprietary** algorithms
- **Access** to multiple data sources
- **Automatic** data transmissions
- **Discovers** primary, secondary and tertiary coverages
