

Greenway[®] Clinical Assist

Your integrated AI-empowered ambient clinical documentation solution

Greenway Clinical Assist is a cutting-edge ambient AI solution built to work natively with your EHR—bringing ambient documentation directly into your existing EHR workflow. By automatically capturing and converting patient conversations into structured clinical notes—right where they're needed—this powerful tool helps reduce documentation time, ease provider burnout, and support more meaningful patient interactions.

The Benefits of Greenway Clinical Assist

✔ Reduce Documentation Friction

Greenway Clinical Assist integrates seamlessly into your EHR workflow, enabling documentation directly within note fields and eliminating the need for manual entry or toggling, saving around 6,000 hours annually.¹

✔ Review Notes in the EHR

Structured draft notes are ready for provider review within the workflows your providers already use.

✔ Support Accurate Risk

Representation and Coding

Clinical Assist's Integrated Hierarchical Condition Category (HCC) coding agent highlights HCC indicators and recommends ICD codes based on the patient's documented health status, ensuring accurate representation of the patient's health data.

✔ Increase Visit Capacity

AI-empowered documentation and tools boost efficiency and care quality, driving an increase in visit capacity and a 20% uplift in revenue.

¹ Calculated for a 10-provider practice

Overcoming Challenges with Greenway Clinical Assist

Streamline Documentation with Effortless EHR Integration

Greenway Clinical Assist transforms traditional documentation by capturing verbal interactions and inserting structured notes into your EHR—minimizing workflow disruptions and supporting more natural, focused patient encounters.

Combat Burnout Through Automated Efficiency

Providers save up to 2.5 hours per day with AI-powered notes that are instantly available and editable within the EHR. The result? Less time spent on charts, and more time for patient care.

Build Lasting Patient Relationships

By reducing documentation friction, Greenway Clinical Assist enables providers to engage more meaningfully with patients, fostering clearer communication, stronger relationships, and improved satisfaction.

Key Features of Greenway Clinical Assist

- ✔ **Direct Integration with your EHR:** No toggling, no extra systems—Clinical Assist is connected to your EHR, ensuring clinical notes are automatically inserted into the appropriate sections of the patient record for a complete and organized chart.
- ✔ **Easy to Deploy, Ready for Use:** Clinical Assist is designed for rapid deployment with minimal IT overhead. It's built to work with your existing tools and infrastructure to enable quick adoption and easy scaling across care teams.
- ✔ **Real-Time Quality Feedback & Editing:** Review, adjust, and approve notes with a single click—directly within your EHR—giving providers full control without disrupting workflow.
- ✔ **Secure & Compliant:** Built on HIPAA-compliant architecture, Greenway Clinical Assist follows strict security protocols for data handling and EHR integration—protecting patient confidentiality and supporting regulatory compliance.

What our Customers are Saying

Our practitioners have been highly appreciative of Greenway Clinical Assist for acute care and sick visits. They are impressed with the detailed history and the clarity of the assessment and plan. Many of our clinicians are also pleased with the comprehensive information included in the notes. Greenway Clinical Assist is highly effective, and our clinicians have been delighted with its ability to differentiate patients and maintain organization.

Dr. Steve Schiebel,
Allegro Pediatrics

I love how Greenway Clinical Assist picks everything up in the note. The doctor will be focused on the patient and go back to reading the note and realize they forgot something, but the note picked it up and reminded them of the conversation. The doctor didn't have to remember to write everything down because it was already captured for him with Clinical Assist.
