

Power Smarter Care Delivery with Greenway's EHR

An intelligent EHR designed to meet the unique needs of FQHCs.

Managing complex billing, compliance, and reporting requirements can strain resources and staff. Greenway Health's EHR platform is purpose-built for FQHCs. Managing complex billing workflows, strengthening financial outcomes, and easing the burden of regulatory compliance.

It's time to adopt a solution that empowers your mission and fuels your growth.

Simplify Sliding Fee and Wrap Billing Workflows

Greenway's EHR supports FQHC-specific billing models—including Sliding Fee, Encounter Rate, and Wrap Billing—right out of the box. These built-in workflows reduce manual effort and help ensure accurate, timely reimbursement. With intuitive dashboards and role-based access, your team can confidently manage even the most complex billing scenarios.

Streamline UDS and HIS Reporting

Greenway's EHR captures Uniform Data System (UDS) and Health Information System (HIS) data directly within clinical workflows eliminating duplicate entry and manual reporting. With over 5,000 reportable fields and 500+ customizable reports, your team can meet compliance requirements efficiently and accurately.

Improve Access and Care for Families

Greenway's EHR family account functionality enables providers to manage multiple family members under a single account streamlining scheduling, billing, and care coordination. This is especially important for FQHCs serving large households. Plus, preventive reminders and growth tracking tools help close care gaps and improve health outcomes.

Secure, Scalable, and Always Up to Date

Greenway's hosted solution removes the burden of on-premise IT. Enjoy 24/7 monitoring, disaster recovery, automatic updates, and enterprise-grade cybersecurity—including endpoint detection, anti-virus, and cyber liability insurance. With scalable pricing and low startup costs, Greenway Hosted delivers peace of mind and a strong return on investment.

Boost Financial Performance and Claim Control

Greenway's EHR helps your team quickly identify at-risk claims, resolve errors, and follow up with payers using intuitive worklists. Real-time analytics deliver insights into accounts receivable (AR), productivity, and patient care empowering smarter, data-driven decisions that strengthen your financial performance.
